## Autopadi Onboarding Screens

This document provides guidance for designing the onboarding screens of the Autopadi app. There should be a total of 4 onboarding screens combining both driver and mechanic flows.

### Screen 1: Welcome & Role Selection

• Welcome message introducing Autopadi.
• Short tagline: 'Connecting Drivers and Mechanics Seamlessly.'

• Simple illustrations of a car (driver) and tools (mechanic).

### Screen 2: Driver Benefits

• Highlights for Drivers:
 - Create a profile with vehicle details.
 - Request urgent or scheduled mechanic services.
 - Track nearby mechanics in real-time.
• Illustration idea: Driver with a car and phone.

### Screen 3: Mechanic Benefits

• Highlights for Mechanics:
 - Upload certificates and showcase skills.
 - Receive service requests from drivers.
 - Manage bookings and track job history.
• Illustration idea: Mechanic holding tools, receiving a job request on phone.

### Screen 4: Get Started

• Common call-to-action for both Drivers and Mechanics.
• Buttons: 'Sign Up' and 'Login'.
• Emphasis on simplicity, security, and speed.
• Illustration idea: Driver and Mechanic shaking hands / partnership theme.

### Adjustment

- Add password to the login screen and confirm password to the signup screen.
- Remove login with facebook and apple and leave login with google.
- Remove referral code from the signup form and change signup name into register and also change the name og sign in to login.
- **We will discuss the remaining corrections later**
